

Proposed Changes for FilmnFun Website

Overview

This document outlines the proposed changes to the FilmnFun website. These changes aim to improve functionality, usability, and the overall user experience.

Changes Summary

Feature/Section	Proposed Changes
Main Blog Section	1. Reduce the image size. 2. Move the title to the top of the post and increase the font size. 3. Adjust divisions so the left side has a larger width.
Admin Page	Add an edit option for all sections.
Polls Section	Align poll cards to the left.
Blog URLs	Change the URL format for created blogs.
What's New Section	Display all sections' latest added posts.
Main Post Styling	Manage font color, font size, and font family through the admin page.
Gallery Section	Add a multi-image field to enable adding multiple images.

Detailed Descriptions

Main Blog Section

Image Size : Reduce the current image size to ensure a more compact and clean look.

Title Placement : Move the blog post title to the top and increase its font size for better visibility.

Layout Adjustment : Increase the width of the left section to emphasize main content.

Admin Page

Introduce an edit option for all sections to enhance content management flexibility.

Polls Section

Align poll cards to the left to maintain design consistency with other elements.

Blog URLs

Update the format of URLs for created blogs to improve SEO and user readability.

What's New Section

Display the latest added posts from all sections in the 'What's New' section to ensure users see the most recent updates.

Main Post Styling

Enable styling options (font color, size, and family) for the main post through the admin page for better customization.

Gallery Section

Add functionality for multiple image uploads to allow adding numerous images to the gallery.
